SUMMARY

Software engineer with 3 years of experience building full-stack products and cloud-native services with a focus on delivering reliable, user-centered solutions across AWS, backend systems, and modern web platforms.

TECHNICAL SKILLS

Languages: Python, Java, C#, TypeScript, SQL

Cloud & Backend: AWS (Lambda, API Gateway, S3, DynamoDB, EMR), REST APIs, Spark

Tools: React, Docker, Kubernetes, Git, Azure DevOps

WORK EXPERIENCE

Amazon (RDS & Billing)

December 2024 – Present

Software Development Engineer | Toronto, ON

- In my first month, helped resolve a production issue in an early launch by fixing a sizing bug that could have caused memory overflow and customer data loss.
- Built a self-service RDS diagnostics export workflow that let customers send logs to S3 for support, reducing manual support work and improving security.
- Owned the self-service RDS feature from design through launch, including security review, threat modeling, and remediation to meet internal standards.
- Designed and launched a full-stack cost-tagging platform that enabled internal teams to tag 15% of total internal spend within the first 6 months of launch, improving attribution of AWS spend to business goals.
- Implemented the cost-tagging service using React/TypeScript and a Java-based backend on AWS including API Gateway, Lambda, S3, DynamoDB, and authorization workflows for tagging, allocation, and reporting.

Centre for Applied AI & Naryant

January 2024 – April 2024

Software Engineer & Data Analyst Intern | Oakville, ON

- Modeled traffic patterns with SUMO and OpenStreetMap to improve urban planning simulations across 10+ zones.
- Built a Python Selenium scraper and ETL pipeline to automate demographic data extraction and transform it into SUMO XML for large-scale simulations.

FreshBooks

May 2023 – August 2023

Full-Stack Software Engineer Intern | Toronto, ON

- Led the CI/CD migration from Jenkins to Azure DevOps for 5+ microservices using Docker and Kubernetes, accelerating delivery ahead of schedule.
- Improved FreshCLI build efficiency by 34% and increased developer productivity by introducing reusable Azure pipeline templates and a custom Code Climate task.

TD Bank

January 2023 – April 2023

Android Developer Intern | Toronto, ON

- Developed and maintained the TD Bank mobile app in Java and Kotlin, delivering responsive UI experiences with Jetpack Compose.
- Improved REST API loading performance through asynchronous retrieval and caching, reducing JSON load times by 15% for smoother app interactions.

GEOTAB

September 2022 – December 2022

Software Engineer & Data Analyst Intern | Oakville, ON

- Developed a city-maintenance web application with React and geospatial analytics for the City of Kingston.
- Executed BigQuery geospatial queries and contributed backend refactors to improve scalability and API responsiveness for large datasets.

SIRT Centre

May 2022 – August 2022

Software Engineer Intern | Toronto, ON

- Built an interactive AR avatar experience for iOS in Unity and C# to improve user engagement.
- Improved application responsiveness by caching frequently used 3D assets, reducing scene load time by about 20%.

EDUCATION

Sheridan College

September 2019 – December 2023

Bachelor of Science in Computer Science | Oakville, ON

- Graduated with High Honours Award, GPA: 3.93
