SUMMARY

Software engineer with a Bachelor's degree in Computer Science and over 3 years of experience in software development.

TECHNICAL SKILLS

Languages: Python (3 years), Java (2 years), TypeScript, C#, SQL

Cloud & Infrastructure: AWS (Lambda, S3, API Gateway, EMR, SNS, Step Functions, CloudWatch, RDS)

Databases: PostgreSQL, DB2, DynamoDB, Oracle

Frameworks & Tools: Spring, React, Docker, Kubernetes, Git, Azure DevOps, CI/CD pipelines

WORK EXPERIENCE

Amazon (RDS & Billing)

December 2024 – Present

Software Development Engineer | Toronto, ON

- Maintained the service calculating internal billing amounts between AWS and the rest of Amazon.
- Designed and launched a full-stack cost-allocation platform that enabled internal teams to attribute 15% of internal AWS spend within the first 6 months, improving spend attribution and enabling ROI reporting for product teams.
- Implemented the cost-allocation platform using React and a Java REST API backend on AWS including Lambda, S3, SNS, Step Functions, DynamoDB, and authorization workflows for tagging, allocation, and reporting.
- Built a self-service RDS diagnostics export feature enabling customers to export database engine logs to S3 for support, replacing a 2 day manual process with a 30 minute secure automation improving support turnaround.
- Owned the self-service RDS feature from design through launch, including security review, threat modeling, and remediation to meet internal standards.
- In the first month, identified and fixed a production sizing bug during early launch that could have caused memory overflow and customer data loss, enabling a stable rollout.

Centre for Applied AI & Naryant

January 2024 – April 2024

Software Engineer & Data Analyst Intern | Oakville, ON

- Modeled traffic patterns with SUMO and OpenStreetMap to improve urban planning simulations across 10+ zones.
- Built a Python Selenium scraper and ETL pipeline to automate demographic data extraction and transform it into SUMO XML for large-scale simulations.

FreshBooks

May 2023 – August 2023

Full-Stack Software Engineer Intern | Toronto, ON

- Led the CI/CD migration from Jenkins to Azure DevOps for 5+ microservices using Docker and Kubernetes, accelerating delivery ahead of schedule.
- Improved FreshCLI build efficiency by 35% and increased developer productivity by introducing reusable Azure pipeline templates and a custom Code Climate task.

TD Bank

January 2023 – April 2023

Android Developer Intern | Toronto, ON

- Developed on the TD Bank mobile app in Java and Kotlin, delivering responsive UI with Jetpack Compose.
- Improved REST API loading performance through asynchronous retrieval and caching, reducing JSON load times by 15% for smoother app interactions.

GEOTAB

September 2022 – December 2022

Software Engineer & Data Analyst Intern | Oakville, ON

- Developed a city-maintenance web application with React and geospatial analytics for the City of Kingston.
- Executed BigQuery geospatial queries and contributed backend refactors to improve scalability and API responsiveness for large datasets.

SIRT Centre

May 2022 – August 2022

Software Engineer Intern | Toronto, ON

- Built an interactive AR avatar experience for iOS in Unity and C# to improve user engagement.
- Improved application responsiveness by caching frequently used 3D assets, reducing scene load time by about 20%.

EDUCATION

Sheridan College

September 2019 – December 2023

Bachelor of Science in Computer Science | Oakville, ON

- Graduated with High Honours Award, GPA: 3.93
